**FAILURE DETERMINATION METHOD FOR AN AIR  
SUPPLY SYSTEM IN A FUEL CELL APPARATUS**

**REASONS FOR ALLOWANCE**

First, it is noted that the Applicant's use of the term "means" throughout the abstract has not been objected to because the term, as used, is not deemed as legal phraseology which may cause an objection thereto.

The following is an Examiner's statement of reasons for allowance:

Claim 1 has been found to be allowable over the prior art because the prior art fails to teach or suggest an oxidizing agent supply system failure determination method for a fuel cell by determining that said oxidizing agent supply system has failed if an absolute value of a difference between an actual value of a supply provided by said oxidizing agent condition adjusting means and a first predetermined value is equal to or greater than a second predetermined value and a predetermined period of time has passed.

Furthermore, it is noted that the preamble of claim 1 has been given patentable weight because the body of the claim relies upon the preamble thereof for completeness.

Claims 2-4 have been found allowable over the prior art due to said claims' dependency on claim 1.

**CONCLUSION**

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
